As of January 2017, AutoCAD is used in project management, architecture, drafting, engineering and visualization. History 1983 Autodesk hired a group of 18 people including Thomas Reis, John Shoch, Brian Ward, and Mark Updegrove to design and build the first Autodesk product, AutoCAD. 1991 AutoCAD 2.0 was released, which significantly enhanced the application's feature set. The first public demonstration of AutoCAD took place at the October 1991 COMDEX trade show. 1993 AutoCAD 3.0 was released, and included improved multi-user capability and user interface. 1993 The company was incorporated and its first shareholders included David Thomas, Soren Sparling, Barry Hicks, Erickson Lancaster, Brian Hunt, Donal Moore, and Thomas Reis. 1994 AutoCAD LT was released, which reduced licensing costs and enabled organizations to use AutoCAD without paying Autodesk. 1995 AutoCAD Map 3D was released, which included a "heads up display" (HUD) and architectural features. It was the first release of AutoCAD to use a completely new file format named DWG. Autodesk introduced the Autodesk 360 Business Platform. 1996 AutoCAD Map 3D Graphical User Interface (GUI) was released, which supported a 3D rendering engine called Map3D. Autodesk's business grew rapidly and the company's annual revenue exceeded $100 million in the first quarter of 1996. In August 1996, Autodesk acquired Realstar International, which enhanced AutoCAD's visualization capabilities. In January 1997, Autodesk introduced the CAD Translator Desktop, which enabled people without AutoCAD skills to use the software. Autodesk acquired Reality Integration, Inc., and the Interactive Dimensioning and Visualization (iDV) System was released in October 1997. 1998 AutoCAD Map 3D Release 3.5 and the AutoCAD Plant 3D product were released, and Plant 3D included the first attempt at an automatic plant floor plan generation feature. AutoCAD Plant 3D Release 3.5 was the first release of AutoCAD that included a round corner feature. In January 1998, Autodesk acquired VideoSystem

Last updated on.From the section Football Bolton Wanderers have reached the FA Cup fourth round for the first time since 1968. Goals from Andrew Ayew, Michael Jacobs, Kevin Davies and substitute Kristian Pedersen sealed the four-goal rout of Luton. Paddy McCourt also scored as fellow home side Stevenage suffered a shock 3-1 second-round replay defeat at Coventry City. The other third-round games went to replay also on Monday night. FA Cup records and details Plans to give replays in the FA Cup fifth round, involving at least two teams from the top four tiers of English football, have been drawn up. In the 2009-10 competition, six games were replayed. The first two were at Wolverhampton Wanderers and Cardiff City, with the following four replayed at Milton Keynes, Peterborough, West Brom and Barnsley. The FA also sought to make sure the competition was played as scheduled, including the earlier kick-off times. The Football Association said it was to encourage its four top professional divisions to reach the quarter-finals of the tournament. The home side, who were facing their first FA Cup third-round home tie for five years, were already assured of a place in the last eight. Ayew, 19, came off the bench to score in the 66th minute and then was handed the captain's armband as Wanderers strengthened their grip on top spot in League One by eight points. The Gunners' Robert Huth was sent off for a second yellow card after just 22 minutes and Davies made it 3-0 just six minutes later. Substitute Pedersen's header made it 4-0 in the 86th minute, but despite winning the penalty for Davies' second goal, the 21-year-old's shot was saved

Existing design templates can now be used to directly incorporate feedback as well. Automatic AutoCAD redrawing for 2D barcodes and reference information: With the new Barcode Markup feature in AutoCAD, simply mark an object with a barcode and the software automatically redraws it. The new Barcode Markup feature also recognizes and displays reference information, such as a part number or owner information, automatically. If reference information is not visible, select "Show reference info" from the options bar to see the reference information. Tip: Add a reference on a drawing to automatically link it to an external document and include the reference in the drawing AutoCAD History Manager: Add, browse, and search across all your Autodesk technical drawing files. Manage all your Autodesk drawings and links easily in one place. Protect your work with security layers, which allow only you to see your designs. Layers may include: Locked — lock layers that prevent unauthorized users from changing or viewing your work Shared — share layers with others, including friends and co-workers. Locking layers also apply to the "Lock area when running," "Auto

lock area with background" and "Lock layer automatically when closing" options in the View options bar. Locking layers are also available when drawing as a template. Lock area when running: When you run your drawing, the entire area of the drawing, which includes objects and gridlines, will be locked to prevent accidental changes. Auto lock area with background: With this option, when you close your drawing, the drawing will automatically lock the entire area of the drawing. Lock layer automatically when closing: When you close your drawing and open it again, AutoCAD will automatically lock the drawing. 4K Mode: Launch new cad mode video work for high resolution rendering, editing, printing, and capturing up to 4K video and still images. New camera modes: Move left or right in the camera, to control the camera view. Move up or down for a bird's eye view. A new Arrange tool (View Arrange) lets you arrange your drawings to print or display on a curved or rectangular plane. Print from your computer to select the correct
