HomeGoods 12 Free Shipping on Orders over Â£ 50.Q: Get the average time (Number of seconds) to process each command on a sequence of commands I have a list of commands on a sequence of commands. Each command takes a long time to process. I'm running each of the commands to see the performance of each command in comparison to the previous command. I want to see the avg time (in seconds) to process each of the commands. I can't find a similar question asked. I want to run the commands in sequence. Here is what I have so far: import os import subprocess import time commands = ['command1', 'command2', 'command3', 'command4'] def main(): output = subprocess.check_output(commands, shell=True) return output def start_process(command): subprocess.Popen(command) start_time = time.time() for x in range(len(commands)): start_time = time.time() output = main() duration = (time.time() - start_time) print(output) print(duration) # avg_time = avg_time + duration main() A:
