About 60 cases with coronary heart disease were treated by acupuncture and moxibustion at Yingxiang (LI 15) and Zhongwan (CV 12) after acupuncture training. Most of the patients showed clinical effective rates of more than 95%. This result also showed that acupuncture at Yingxiang (LI 15) and Zhongwan (CV 12) could antagonize and regulate the function of the main organs in coronary heart disease. In all the 60 cases, electrocardiogram (ECG), and the myocardial ischemia model (Tukang test) were also tested before and after treatment. ECG showed that the P wave and the P-R interval was decreased and T wave was shifted upward by acupuncture. In the Tukang test, ischemia of both sublingual and fore-arm showed improvement of pain and the ischemic symptom. 0.1141 0.1146 0.1136
